

CHRISTOPHER J. JOHNSON

Salt Lake City, UT | 801-493-5789 | camjohnson0618@gmail.com

PROFESSIONAL SUMMARY

Senior Product Security Engineer with 10+ years driving enterprise security strategy, vulnerability management, and third-party penetration testing programs. CISSP and GWAPT certified. Trusted advisor to product engineering leadership on architecture and threat modeling decisions, translating findings into org-wide security roadmaps rather than one-off remediations. Track record of building the frameworks, dashboards, and cross-functional partnerships that let security scale across a large, multi-product portfolio.

CORE COMPETENCIES

Security Strategy & Architecture Consulting | Penetration Test Program Management | Vendor & Customer Coordination | Vulnerability Management | Application Security | Risk Assessment | Security Dashboarding & Reporting | Identity & Access Management | Cross-Functional Security Partnership | Secure SDLC (SPLC) | Full-Stack Web Development

PROFESSIONAL EXPERIENCE

Senior Product Security Engineer — Adobe Inc.

Jul 2025 – Present

Support Adobe's product security testing and vulnerability management programs to maintain customer trust and ensure transparency and partnership with customers.

- Coordinate and manage customer and outsourced penetration testing projects with internal teams and external consultants.
- Partner with product engineering teams to scope, schedule, and execute penetration testing projects for both outsourced and customer-initiated penetration tests
- Serve as technical arbiter on vendor-reported findings — triaging, validating, and re-testing vulnerabilities and pushing back on vendor assessments where evidence doesn't support severity.
- Build security dashboards to surface insights and provide actionable guidance to product engineering teams.
- Serve as Lead Engineer for Customer Penetration Testing program.
- Review legal contracts for penetration testing rights, and coordinate projects in liaison with Product Engineering Development Teams and Account Executives.

Senior Security Partner — Adobe Inc.

Aug 2022 – Jul 2025

Served as primary security point of contact for a portfolio of 6-10 concurrent Adobe solution teams, defining and prioritizing security work.

- Consulted as security subject matter expert on product architecture decisions, shaping design choices before code was written rather than remediating after the fact.
- Built security roadmaps and dashboards used across the portfolio to provide clear objectives and priorities that improved overall security posture.
- Reviewed new product developments and recommended threat modeling and penetration testing exercises, ensuring secure software standards were followed org-wide.
- Established relationships with product engineering teams to understand and remediate security vulnerabilities.
- Maintained cross-functional alignment across Adobe Security teams, including Cyber Operations, Security Engagement, Compliance, and Product & Software Security.
- Collaborated with security researchers to drive resolution of strategic security initiatives identified through in-depth analysis and research.

Software Security Analyst — Adobe Inc.

Apr 2018 – Aug 2022

Managed and coordinated outsourced penetration testing projects across the entire Adobe Experience Cloud product portfolio.

- Redesigned penetration test scoping methodology across the Experience Cloud portfolio, reducing security testing budget spend by 50% in 2021 while improving finding quality.
- Planned and executed security testing projects using organizational resources to ensure projects began and ended successfully and within budget.
- Led vulnerability management efforts for penetration test findings, adhering to Adobe's SPLC standards by creating and assigning Jira tickets and overseeing remediation of all Critical, High, and Medium severity findings.

- Partnered with legal, sales, and security teams on customer communications and inquiries related to Adobe security testing efforts.
- Promoted web application security awareness through a Hacker Village training exercise using OWASP open-source tooling at Adobe Tech Summit 2019.

Senior Advisor, Cyber Security Risk — Rio Tinto

Jan 2017 – Apr 2018

Performed risk assessments for SaaS usage, networking standard changes, and product collaboration tools.

- Performed risk assessments across business units for IT initiatives, cloud service provisioning, and infrastructure updates.
- Provided cyber security risk consultation and guidance for new product developments across global mining operations.
- Served as primary point of contact for the Rio Tinto Kennecott Copper Mine networking team.
- Documented and reviewed risks using RSA Archer.

Information Security Risk Analyst — The Church of Jesus Christ of Latter-day Saints

Jan 2016 – Jan 2017

Corporation of the Presiding Bishopric

- Conducted risk assessments for changes in network and firewall rules.
- Supported organizations across initiatives to maintain confidentiality, integrity, and availability of systems.
- Participated in quarterly security reviews as part of PCI compliance adherence.

IT Risk & Information Security Analyst — American Express

Jan 2015 – Jan 2016

- Served as Business Unit Security Administrator, primarily responsible for identity and access management provisioning.
- Supported IT Risk function for business continuity and disaster recovery compliance.

Business Systems Analyst — American Express

Aug 2013 – Jan 2015

- Provided 2nd-level technical support and served as escalation manager for Severity 1 & 2 issues for the Global Automation & Deployment team, Prepaid Card Operations.

Fraud Customer Care Specialist — American Express

May 2012 – Aug 2013

- Analyzed and actioned fraud claims and reported charges from high-value American Express cardholders.

Customer Care Representative — American Express

Aug 2008 – May 2012

- Provided inbound customer service for American Express Prepaid Card customers, including bulk corporate orders, using backend mainframe and in-house payment processing applications.

EDUCATION
